		MIchael Granillo	1st Quarter	Week Beginning: August 15-18
	School Year: 2023-24		**Subject: Algebra 1**	

Monday	Notes:	Objective: Lesson Overview: No School	Academic Standards:
Tuesday	Notes:	Objective: Students will simplify expressions, both numerical and algebraic, using the distributive property, and apply it to real world situations. Lesson Overview: 1.4 - WE will build on the student's knowledge of order of operations and explore the distributive property, starting with a pictural model.	Academic Standards: A.SSE.1a A.SSE.2
Wednesday	Notes: Picture Day	Objective: Students will evaluate expressions involving absolute value. Lesson Overview: 1.5 - We will continue to build knowledge of simplifying expressions by adding absolute value symbol. Students will eventually apply this to real world problems.	Academic Standards: A.SSE.2
Thursday	Notes:	Objective: Students will use different quantities for the purpose of descriptive modeling, and report solutions with an appropriate level of accuracy. Lesson Overview: 1.6 - Descriptive modeling is a way to mathematically describe real world situations. We will use metrics to assign values to specific variables to establish patterns in data and create a rule. The accuracy of the results is dependent on the accuracy of the measurement.	Academic Standards: N.Q.2 N.Q.3
Friday	Notes: I will have a sub today.	Objective: Students will answer 5 essential questions covered in this module as review. They will also demonstrate fluency in evaluating and simplifying expressions. Lesson Overview: Chapter 1 Review vocabulary and worksheet.	Academic Standards: NA
