

Michael Granillo		1 st Quarter	Week Beginning: August 15-18
School Year: 2023-24		Subject: Physics (H)	
Monday	Notes:	Objective: Lesson Overview: No School	Academic Standards:
Tuesday	Notes:	Objective: Students will explore the effects of gravity on freely falling objects and determine the gravity constant. Students will apply the findings to solve problems. Lesson Overview: 2.6 - We will look at objects in free fall that have constant acceleration. We will conduct an experiment in an attempt to measure the acceleration due to gravity.	Academic Standards: S.P.2 S.P.3
Wednesday	Notes:	Objective: Students will review the concepts from this chapter and apply them to review problems to show mastery on the exam tomorrow. Lesson Overview: Chapter 2 Review – We will be working on 5 review problems as a group and then the students will work on 5 individually.	Academic Standards: S.P.1 S.P.2 S.P.3
Thursday	Notes:	Objective: Students will demonstrate their level of mastery of the concepts covered in Chapter 2. Lesson Overview: Chapter 2 Test	Academic Standards:
Friday	Notes: I will have a sub on this day	Objective: Students will expand on their knowledge of Kinematics by reviewing and correcting their test. Lesson Overview: Students will be able to use their notes and the textbook to correct problems they missed on the test.	Academic Standards:
