| School Year: 23-24 |  |  | Subject: AP Calculus AB |  |  |
| 3 $\frac{3}{0}$ $\frac{0}{0}$ $\stackrel{2}{2}$ | Notes: | Objective: Students will create a difference quotient to represent the slope of a curve. <br> Lesson Overview: <br> Notes: "Big picture" concept of what a derivative is and two ways to write one: a difference quotient in terms of a small horizontal distance $h$ and a difference quotient between two x-values. <br> Students work in partners to simplify difference quotients before trying book examples independently. |  |  | Academic Standards: <br> AP Calculus AB <br> 2.2 Defining the Derivative of a Function and Using Derivative Notation 1.D Identify an appropriate mathematical rule or procedure based on the relationship between concepts (e.g., rate of change and accumulation) or processes (e.g., differentiation and its inverse process, anti-differentiation) to solve problems. |
| $\begin{aligned} & \text {-1 } \\ & \stackrel{1}{0} \\ & 0 \\ & \stackrel{0}{2} \end{aligned}$ | Notes: |  | iors will be taking th |  | Academic Standards: N/A |
|  | Notes: | Obj <br> deriv <br> Less <br> Disc imp nor each bet <br> Stud | s will use the powe omial functions. <br> vatives do not exist. Difference betwee s on what informati gs (a point and a slo velocity, and accele <br> pairs on textbook pr |  | Academic Standards: <br> AP Calculus AB <br> 2.4 Connecting Differentiability and Continuity: Determining When Derivatives Do and Do Not Exist 3.E Provide reasons or rationales for solutions and conclusions. <br> 2.5 Applying the Power Rule 1.E Apply appropriate mathematical rules or procedures, with and without technology. |
| 군 들 No $\stackrel{2}{2}$ | Notes: | Obj to find Less Disc and nec func ord <br> Stud prac | s will use the produ ives of rational func <br> ds of functions will r ? Proof of why the simplified and unsim o different answers. <br> ependently on the se rules. |  | Academic Standards: <br> AP Calculus AB <br> 2.8 The Product Rule 1.E Apply appropriate mathematical rules or procedures, with and without technology. 2.9 The Quotient Rule 1.E Apply appropriate mathematical rules or procedures, with and without technology. |

| $\begin{aligned} & \frac{7}{7} \\ & \frac{\overline{1}}{2} \\ & \stackrel{1}{2} \end{aligned}$ | Notes: | Objective: Students will be able to match derivative graphs to their original functions. <br> Lesson Overview: <br> Use Desmos.com to practice sketching derivatives for various basic functions (constant, linear, quadratic, and basic trig). Use printed worksheets to match derivative graphs to their original functions. Also introduce different notations commonly used for derivatives. | Academic Standards: <br> AP Calculus AB <br> 2.2 Defining the Derivative of a <br> Function and Using Derivative <br> Notation 1.D Identify an <br> appropriate mathematical rule or <br> procedure based on the <br> relationship between concepts <br> (e.g., rate of change and accumulation) or processes (e.g., <br> differentiation and its inverse process, anti-differentiation) to solve problems. 4.C Use <br> appropriate mathematical symbols and notation (e.g., Represent a derivative using $f^{\prime}(x)$, $y^{\prime}$ and $d y / d x$. |
