MIchael Granillo		3rd Quarter	Week Beginning February 26
School Year: 2023-24		Subject: Algebra 1	

	Notes:		
Monday	Notes:	Objective: Students will be able to graph linear equations using intercepts and slope. Lesson Overview: 4.1 - We will graph linear equations from tables and look for patterns (slopes and intercepts)	Academic Standards: A.REI.10 F.IF.7
Tuesday	Notes:	Objective: Students will define rate of change and be able to interpret it on graphs of lines and tables. Lesson Overview: 4.2, 4.3 - Students will be introduced to slope as rate of change. We will use the slope-intercept form of a line to graph equations.	Academic Standards: F.IF.6 F.LE.5 F.IF.7a A.CED.2
Wednesday	Notes:	Objective: Students will write and graph equations of arithmetic sequences. Student will also learn the key features of absolute value graphs. Lesson Overview: 4.5, 4.7 - Students will work with partners to find patterns in sequences of numbers and then come up with an equation to model it. We will also introduce absolute value graphs, focusing on the vertex.	Academic Standards: F.BF.1a F.BF.2 F.LE.2 F.IF.7b F.BF.3
Thursday	Notes:	Objective: Students will synthesize the topics from Chapter 4 to prepare for the test tomorrow. Lesson Overview: Chapter 4 Review	Academic Standards:
Friday	Notes:	Objective: Students will review the concepts from this semester. Lesson Overview: Cumulative review	Academic Standards:
